CARGO SOLUTIONS

DASH 8-400

Building on the popularity of the Dash 8-400 as a passenger aircraft, De Havilland Canada (DHC) introduces a series of freighter options to better serve the expanding cargo market.

DISCOVER THE DASH 8-400 FREIGHTER

Now, Dash 8-400 owners can easily extend the use of their aircraft and enhance overall value throughout their life cycles. The Dash 8-400 is known for its high revenue-generating capabilities and low unit cost of operation as much as for its rugged design and exceptional performance and reliability.

Why the Dash 8-400 Freighter?

Cargo market is growing

Asset value is in range

Conversion solutions are available

PLUS — The Built-in Values of the Dash 8-400

- Outstanding airfield accessibility
- Hot & high performance
- Range capability up to 1,640 nm
- Operation (no tipping concern)
- Obsolescence protected
- Low operating costs
- Long structural life
- ICAO Ch. 14 noise standard
- Low CO₂ emissions
- Great maintainability & reliability
- Global support infrastructure

VERSATILITY FOR YOUR BUSINESS MODELS

From light e-commerce packages to bulky car parts and everything in between, cargo needs to be transported to and from small communities.

In times like those faced during the COVID-19 pandemic, the demand for supplies in remote locations becomes even more critical. The Dash 8-400 rises to this challenge, whereas larger freighters can be impractical if not outright prohibitively uneconomical. DHC is perfectly positioned to offer all cargo solutions through original equipment manufacturer (OEM) Service Bulletins approved by Transport Canada. From complete kit installation to on-site support, DHC is ready to provide a wide range of OEM support as desired by our customers.

REVENUE EXPANSION

QUICK CHANGE - QC

- Reversible all-passenger or all-cargo configurations
- Conversion possible in under five hours

REVENUE OPTIMIZATION

CARGO COMBI - CC

- Mixed passenger and cargo operation
- Separate compartments for quick turnaround

E-COMMERCE EXPRESS

PACKAGE FREIGHTER - PF

- Over 10 tonnes capacity
- Bulk loading from five access doors

CONTAINERS & PALLETS

FREIGHTER WITH LARGE CARGO DOOR - F-LCD

- Cargo loading system
- Up to nine LD3 containers, plus miscellaneous cargo

Quick Change Dash 8-400 QC

The quick change solution is a revenue expansion model that offers flexibility to convert the Dash 8-400 between all-passenger and all-cargo configuration.

Operators can combine two distinctive income streams into one, significantly expanding their revenue base. The short time required to switch from one configuration to the other allows operators to match market dynamics swiftly. By installing a new smoke detection system in the cabin to convert it into a Class E compartment, no attendants are required in the cabin for cargo flights.

→ Dash 8-400 QC Expands Revenue Potential and Enhances Utilization

New Smoke Detector

Reversible in 4-5 hours

Cargo Combi Dash 8-400 CC

The Dash 8-400 Cargo Combi is a mixed revenue model that offers another level of flexibility by combining passenger and cargo transport at the same time.

Up to 68 passenger seats in the forward cabin and an extended Class “C” cargo compartment in the aft fuselage. In addition to checked baggage, there is ample space in the cargo compartment for freight thanks to the logical layout of the Dash 8-400 that facilitates the Cargo Combi configuration. The two pressurized compartments are separated by a bulkhead and operated independently, with simultaneous passenger boarding and cargo loading at opposite ends of the aircraft. The Cargo Combi configuration is ideal for operation on point-to-point markets in small communities where cargo supplies are as important as passenger transport.

Note: Cargo Combi production-certified retrofit is subject to launch.

828 ft³ / 23 m³ cargo compartment option shown

Package Freighter Dash 8-400 PF

The Dash 8-400 Package Freighter allows bulk loading of various sizes of cargo, such as e-commerce packages.

There are nine distinct loading zones with eight radial spider nets providing tie-down and restraint functions. The primary cargo access door is in the same position as the aft LHS baggage compartment door in all Dash 8-400 aircraft, and there are four additional access doors (one at the front and one at the back on each side of the aircraft) to facilitate quick loading and unloading of cargo. It is ideal for the transportation of e-commerce packages. An optional Cargo Loading System is also available for palletized cargo.

PAYLOAD

Up to 10.2 T /
22,500 lb

VOLUME

Up to 79.3 m³ /
2,800 ft³

RANGE

Up to 1,555 nm

Full Freighter with Large Cargo Door Dash 8-400 F-LCD

The Dash 8-400 Package Freighter can be equipped with a large cargo door (LCD) and a cargo loading system to provide a containerized cargo model that facilitates the transport of unit load device (ULD) pallets or containers.

With the LCD measuring 107" x 71.5" (2.7m x 1.8m), the Dash 8-400 is equipped to handle typical containers such as LD1, LD2, LD3, and LD4. For example, it can carry as many as nine LD3 containers. This allows interline transfer of containers from other aircraft in the network. It is ideal for hub-and-spoke network carriers as well as major logistics operators.

NOSE-TO-TAIL SUPPORT SOLUTION

An OEM solution to aircraft modification always offers incremental advantages over a third party Supplemental Type Certificate (STC) solution. From a certification standpoint, De Havilland Canada has accumulated engineering experience since the original design of the Dash 8-400 aircraft and has worked with aviation authorities on many certification processes. From a support and services standpoint, it is in De Havilland Canada's utmost interest to ensure that – in addition to the modification – the entire aircraft is well-supported throughout its life cycle. Any De Havilland Canada modification solution will be well-designed, tested, and certified to ensure full integration with the rest of the aircraft system.

^A Assumptions: cargo density @ 6 lb/ft³ (96 kg/m³), still air range, ISA en-route temperature, 100 nm diversion, 45 min hold at 15,000 ft, 5% flight fuel contingency

^B Based on 74-seat configuration

^C Based on 50-seat configuration

^D Based on eight LD3 containers plus miscellaneous cargo

All cargo conversions are dependent on the existing aircraft configuration and are subject to a Pricing & Offerability Assessment. Conversions include the Service Bulletin and Kit. Installation by De Havilland Canada personnel, affiliates, or Authorized Service Facilities is subject to availability and shall be assessed upon request.
